

PERFORMANCE REPORT

Top 25 Records in History and National Class Leader List

The Top 25 Records for Milk, Protein and Fat—regardless of age—completed in the history of AJCA production testing programs are listed below. These lists include extended lactations of no more than 365 days made official by the American Jersey Cattle Association through December 31, 2006.

The National Class Leader List summarizes the 10 highest lactations for milk, protein, fat, and cheese yield in nine age categories.

Lactations are 305 days (or less) in length and are official on the AJCA records. The list is for lactations added to the database through December 31, 2006.

An asterisk in the column after days milked indicates that the animal was milked more than twice daily during part or all of the lactation. A “V” following the record indicates that it has been verified.
